**A JOINT
PROGRAMME
THE SOMALIA
IDSF TEAM**

The Internal Displacement Solutions Fund (IDSF) was established by the Office of the Special Adviser on Solutions to Internal Displacement to the UN Secretary General. The IDSF is a “catalytic” fund that aims to support government-led solutions planning, strengthen accountability frameworks, and enhance multi-agency approaches to solutions.

The IDSF Somalia programme commenced in February 2024 and will run to July 2026. The first year of the programme provided support to the Federal Government of Somalia in the development of the landmark **Solutions Pathways Action Plan**. The plan lays out a government-led framework to support 1 million IDPs to advance towards solutions. The next stage of the programme will leverage support from participating agencies in implementing the plan.

Access the IDSF Somalia page here on the Multi-Partner Trust Fund Office (MPTFO) website: <https://mptf.undp.org/project/00140621>. Additionally, all IDSF Somalia products can be accessed by scanning the QR code.

3 PROGRAMME OUTCOMES

Support **government coordination**, ensuring IDP solutions planning is nationally owned and inclusive.

Support **data for solutions**, strengthening the evidence base on IDP solutions anchored in government frameworks (population and institutional level data).

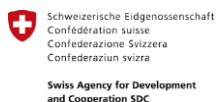

Support **people-centered solutions in urban areas** through developing sustainable urban plans as well as economic and protection studies.
